

# PoundMaker Pasture Mixture

**PoundMaker Pasture Mixture:** Introducing our Poundmaker Pasture Mixture, Carefully crafted for maximizing haying capability. Mixing alfalfa with timothy, orchardgrass, and tall fescue creates a balanced forage blend that provides both high protein and fiber for livestock. Alfalfa's rich nutrient content complements the more fibrous timothy and orchardgrass, promoting healthy digestion and preventing issues like bloat. Tall fescue, known for its resilience in various climates, adds drought tolerance and enhances the mixture's overall productivity. This combination ensures a more consistent forage supply throughout the growing season. With proper management, this mix can improve soil fertility, boost yield, and support better animal health through its diverse nutrient profile.

## Mixture:

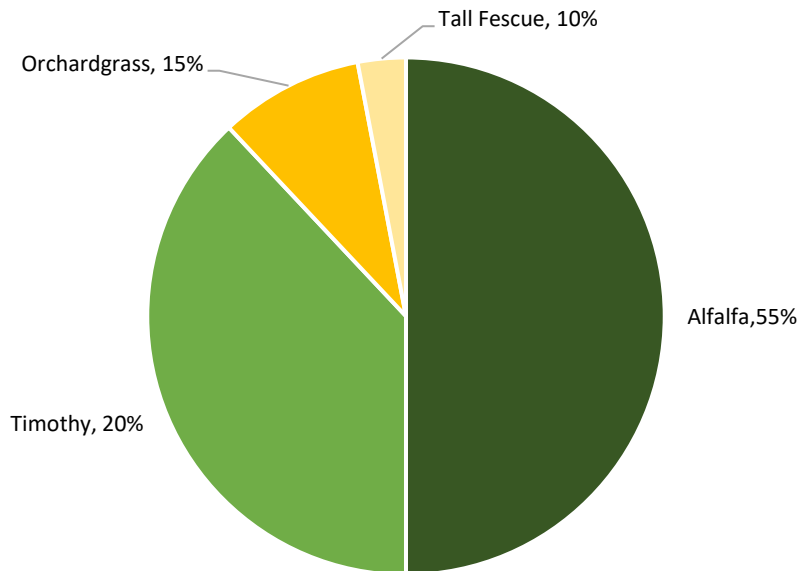

55% Alfalfa

20% Timothy

15% Orchardgrass

10% Tall Fescue

## PoundMaker Pasture Mixture

## Recommended Seeding Rate

### Broadcast

- 15-20 lbs per acre

### Drilled

- 10-15 lbs per acre
